*Computational Evolutionary Biology, Statistical Population Genetics*

## Summary

---

I am an evolutionary biologist focused on computational population genomics. I want to understand how molecular-level processes interact with population-level processes to shape patterns of variation at different scales. To this end, I develop novel theoretical methods, assemble them into inference tools and apply them to both simulated and real data. My long-term goal is to build more realistic models of nature.

## Skills

---

Most of my research follows a comprehensive work-flow where I **(1)** develop and implement a statistical model; **(2)** bench-mark it using simulations; and **(3)** apply it to real datasets to draw biological conclusions. My approach touches on all of the core aspects of modern evolutionary biology, from describing a scientific problem as a solvable algorithm to interpretation of the results and investigation of follow-up questions in hypothesis-driven fashion.

I highlight the following as part of my tool-box:

### PROGRAMMING:

- Development and maintenance of C++ source code implementing statistical models
- R scripting for data analyses and visualization
- UNIX Shell scripting for large-scale manipulation of big datasets

### DATA AQUISITION & HANDLING

- Experience with computing cluster environments (SLURM, TORQUE)
- Experience with simulation engines (SLiM and ms-like coalescent simulators)
- Experience with wet-lab protocols for DNA extraction, amplification and sequencing
- Field work in the Atlantic Rainforest

## Education

---

### Max Planck Institute for Evolutionary Biology

Plön, Germany

2016 - 2019

Ph. D. in Evolutionary Genetics

Adviser: Dr. Julien Dutheil

### Universidade de São Paulo

São Paulo, Brazil

2009 - 2011

M. Sc. in Evolutionary Genetics

Adviser: Dr. Maria Cristina Arias

### Universidade Regional de Blumenau

Blumenau, Brazil

2005 - 2008

B. Sc. in Biology

Adviser: Dr. Geraldo Moretto

## Academic Work Experience

---

### University of Wisconsin

Madison, USA

2022 -

Post-doctoral research

Supervisor: Dr. Aaron Ragsdale

### University of California, Los Angeles

Los Angeles, USA

2019 - 2022

Post-doctoral research

Supervisor: Dr. Kirk Lohmueller

## Academic Service & Supervision

---

### Co-supervision of internship student Armaan Singh

We developed a data structure to compute summary statistics over tens of thousands of family trios.

*University of California, Los Angeles, 2021*

### Co-supervision of Hiwi student Nataša Puzovic

We used simulations to benchmark the inference of the recombination landscape under complex demography.

*MPI for Evolutionary Biology, 2018*

### Co-supervision of internship student Pallavi Misra

We used simulations to benchmark the inference of demographic events.

*MPI for Evolutionary Biology, 2017*

### Co-supervision of internship student Nataša Puzovic

We analysed single-cell transcriptomics data in the context of selection on gene expression noise.

*MPI for Evolutionary Biology, 2016*

## Selected Talks

---

- Disentangling dominance, selection and epistasis using approximate Bayesian computation (**Invited**) 2021  
**Centre for Genomic Regulation (Barcelona)**. Hosts: David Castellano & Donate Waghorn
- Mutation rate variation shapes the genome-wide distribution of diversity in *Drosophila melanogaster* 2021  
**2021 SMBE Meeting (Virtual)**
- Trio-based inference of dominance and selection 2021  
**Probabilistic Models in Genomics (Virtual)**
- The Neanderthal recombination map (**Invited**) 2018  
**University of Bern**. Hosts: Fanny Pouyet & Laurent Excoffier
- An integrative model for population genomics inference 2018  
**II Joint Meeting of Evolutionary Biology** (Montpellier)
